

2025 MLR Rebate Checks to Be Issued Soon to Fully Insured Plans

Issued date: 09/09/25

As a reminder, insurance carriers are required to satisfy certain medical loss ratio (“MLR”) thresholds. This generally means that for every dollar of premium a carrier collects with respect to a major medical plan; it should spend 85 cents in the large group market (80 cents in the small group market) on medical care and activities to improve health care quality. If these thresholds are not satisfied, rebates are available to employers in the form of a premium credit or check.

If a rebate is available, carriers are required to distribute MLR checks to employers by September 30, 2025.

Importantly, employers must distribute any amounts attributed to employee contributions to employees and handle the tax consequences (if any).

This does not apply to self-funded plans.

What to Do with this MLR Rebate Check?

The rules around rebates are complex and require careful review with ERISA counsel. Among other things, an employer receiving a rebate as a policy holder will need to determine:

- who receives a rebate (e.g., current participants v. former participants);
- the form of the rebate (e.g., premium reduction v. cash distribution);
- the tax impacts of any such rebate (on both the employer and participants receiving the rebate); and
- what, if any, communication to provide participants regarding the rebate.

The following questions and answers are designed to provide information as to what employer action may be necessary.

What will the rebate amount be?

Carriers determine MLR on a state basis by market segment (individual, small group, or large group). Carriers do not disaggregate by type of plan within these markets (e.g., PPO v. HMO v. HDHP) or by policyholder so the carrier will have to let you know the amount.

A carrier is not required to provide a rebate to an enrollee if the total rebate owed is less than \$20 per subscriber (\$5.00 when a carrier pays the rebate directly to each subscriber). This rule regarding de minimis amounts only applies to the carrier, not to employers refunding amounts to participants.

Will there be any communication?

Yes.

For each MLR reporting year, at the time any rebate of premium is provided, a carrier must provide the policyholder and each current enrollee who was also enrolled in the MLR reporting year in a form prescribed by HHS.

Employers do not have to notify employees, but they may want to address the notices being distributed by the carriers. Language similar to the following provides a starting point for such a notice:

Employees should have received a notice of rebate from [carrier]. In short, [Employer] received a rebate check in the amount of \$____. Amounts attributable to participant contributions will be used to [reduce premium amounts] for [currently enrolled employees] in accordance with legal requirements. These amounts will be reflected in the [September ____] paychecks.

What will the form of rebate to the employer be?

Carriers may issue rebates in the form of either a premium credit (i.e., reduction in a premium owed), a lump-sum payment, a lump-sum reimbursement to the account used to pay the premium if an enrollee paid the premium using a credit card or direct debit, or a “premium holiday,” if this is permissible under state law.

When will the rebate be issued?

Rebates must be paid by **September 30** each year. A carrier that fails to timely pay any rebate must additionally pay the enrollee interest at the current Federal Reserve Board lending rate or 10% annually, whichever is higher, on the total amount of the rebate, accruing from the date payment was due.

Do employers have to give some or all of the rebate to participants?

Yes, unless they paid 100% for all tiers of coverage.

Carriers will generally send rebate checks to employers and employers must mete out any amounts attributed to employee contributions to employees and handle the tax consequences.

There is no one formula for employers to use, but guidance has been provided to aid employers.

ERISA-covered group health plans

To the extent that rebates are attributable to participant contributions, they constitute plan assets. Plan assets must be handled in accordance with the fiduciary responsibility provisions of Title I of ERISA.

If the employer is the policyholder, determining the plan's portion, if any, may depend on provisions in the plan or the policy or on the manner in which the plan sponsor and the plan participants have shared in the cost of the policy. If the plan or its trust is the policyholder, in the absence of specific plan or policy language to the contrary, the entire rebate would constitute plan assets, and the policyholder would be required to comply with ERISA's fiduciary provisions in the handling of rebates that it receives.

The HHS regulations and related DOL guidance for ERISA plans leave to the policyholder the decision as to how to use the portion of a rebate that constitutes plan assets, subject to ERISA's general standards of fiduciary conduct. The DOL notes that, in choosing an allocation method, "the plan fiduciary may properly weigh the costs to the plan and the ultimate plan benefit as well as the competing interests of participants or classes of participants provided such method is reasonable, fair and objective." An allocation does not necessarily have to exactly reflect the premium activity of policy subscribers. A plan fiduciary may instead weigh the costs to the plan and the competing interests of participants or classes of participants when fashioning an allocation method, provided the method ultimately proves reasonable, fair, and objective. If the fiduciary finds that the cost of passing through the rebate to former participants would exhaust most of those rebates, the proceeds can likely be allocated to current participants.

Guidance does not address how to handle an MLR rebate where the amount is inconsequential (e.g., a dollar per participant). Taking a cue from DOL Field Assistance Bulletin No. 2006-01, a fiduciary may be able to conclude, after analyzing the relative costs, that no allocation is necessary, when the administrative costs of making correction far exceed the amount of the allocation.

If a plan provides benefits under multiple policies, the fiduciary is instructed to allocate or apply the plan's portion of a rebate for the benefit of participants and beneficiaries who are covered by the policy to which the rebate relates provided doing so would be prudent and solely in the interests of the plan according to the above analysis. But, according to the DOL, "the use of a rebate generated by one plan to benefit the participants of another plan would be a breach of the duty of loyalty to a plan's participants."

Plans that are neither covered by ERISA nor are governmental plans (e.g., church plans)

With respect to policyholders that have a group health plan but not a governmental plan or a plan subject to ERISA, carriers must obtain written assurance from the policyholder that rebates will be used for the benefit of current subscribers or otherwise must pay the rebates directly to subscribers.

The final rule issued on February 27, 2015, provides that subscribers of non-federal governmental or other group health plans not subject to ERISA must receive the benefit of MLR rebates within three (3) months of receipt of the rebate by their group policyholder, just as subscribers of group health plans subject to ERISA do.

When do rebates need to be made to participants?

As soon as possible following receipt and, in all cases, within 3 months of receipt.

What is the form of rebate to participants?

There is no one way to determine this, but guidance has been provided to aid employers.

Reductions in future premiums for current participants is probably the best method.

If proceeds are to be paid to participants in cash, the DOL is likely to require that payments go to those who participated in the plan at the time the proceeds were "generated," which may include former employees. An option that may be easier to administer is to keep the proceeds in the plan and provide a "premium holiday" (suspension of required premiums) or a reduction in the amount of employee-paid premiums.

The interim final regulations for non-ERISA governmental plans require that rebates be used to reduce premiums for all health plan options for subscribers covered when the rebate is received, to reduce premiums for current subscribers to the option receiving the rebate, or as a cash refund to current subscribers in the option receiving the rebate. In each case, the regulations allow the rebate to be allocated evenly or in proportion to actual contributions to premiums. Note that the rebate is to be used to reduce premiums for (or pay refunds to) employees enrolled during the year in which the rebate is actually paid (rather than the MLR reporting year on which the rebate was calculated).

To recap, here are some options to consider:

- Reduce future premiums for current plan participants. This is administratively easy with limited tax issues with respect to participants.
- Cash payments to current participants. This is administratively burdensome and results in tax consequences to participants.
- Cash payments to former participants. This is administratively burdensome and results in tax consequences to former participants.

The employer could also consider, with counsel, whether providing benefit enhancements or payment of reasonable plan expenses would be considered permissible.

What are the federal tax implications to employees?

Pre-Tax Premium Payments

When employees pay their portion of the premiums for employer-sponsored health coverage on a pre-tax basis under a cafeteria plan, MLR rebates will be subject to federal income tax and wages. Briefly:

- For rebates that are distributed as a reduction in premium (thus reducing an individual's pre-tax premium payment during the year), there is a corresponding increase to the employee's taxable salary that is also wages taxable for employment tax purposes.
- Rebates that are distributed as cash will result in an increase in taxable income that is also wages subject to employment taxes.

The result is the same regardless of whether the MLR rebates are provided only to employees participating in the plan both in the year employees paid the premiums being rebated and the year in which the MLR rebates are paid, or to all employees participating in the plan during the year the MLR rebates are paid (even if some employees did not participate in the plan during the year to which the rebate applies.)

After-Tax Premium Payments

When employees pay their portion of the premiums on an after-tax basis, MLR rebates generally are not subject to federal income tax or employment taxes. This applies when the rebate is provided as a reduction in premiums or as a cash. The result is the same regardless of whether the MLR rebates are provided only to employees participating in the plan both in the year employees paid the premiums being rebated and the year in which the MLR rebates are paid, or to all employees participating in the plan during the year the MLR rebates are paid (even if some employees did not participate in the plan during the year to which the rebate applies).

What are the tax implications to employers?

Employers should review the tax implications of a rebate with tax advisors. Generally, amounts used for benefits (e.g., to pay premiums with respect to insured plans) should not be taxable.

When employees pay premiums on a pre-tax basis, does reducing a participant's premiums mid-year allow them to make election changes?

Probably not.

If employee contributions are paid on a pre-tax basis and there is a mid-year rate change, the cafeteria plan must determine whether such a change is permitted under the Section 125 rules.

If the plan incorporates the permitted election change rules, the relevant issue is whether this change in cost is permitted under the regulations.

- If there is an insignificant decrease¹, there can be an automatic adjustment.
- If there is a significant decrease, employees may make a corresponding change including commencing participation in the cafeteria plan for the first time for the option with a decrease in cost.

Generally, MLR rebates are expected to be fairly low dollar amounts and may not rise to the level of a significant change. Employers should consider either taking the position that the cost change is insignificant or that the cost change is significant and the "corresponding change" is to simply allow the reduction or increase. The cafeteria plan document should be consistent with the employer's position.

¹There is little guidance in the regulations on what constitutes a "significant change." An example relating to dependent care assistance program benefits indicates that, under the particular facts, a 12.5% change in the cost of care (from \$4,000 to \$4,500) may be significant. However, this 12.5% threshold should not be viewed as a safe harbor. Consequently, employers will need to make the "significant vs. insignificant" determination based upon all the facts and circumstances.
